

United States Senate

WASHINGTON, DC 20510

March 21, 2019

The Honorable William P. Barr
Attorney General
U.S. Department of Justice
950 Pennsylvania Avenue, NW
Washington, DC 20530

Dear Attorney General Barr:

We write to express our deep concerns with documents suggesting that the Justice Department discussed the possibility of violating the confidentiality of information collected during the decennial census.¹ With the start of peak census operations only 11 months away, we urge you to confirm that the Justice Department and all of its employees will uphold the airtight confidentiality protections for data collected in the census under current law.²

The Census Act explicitly prevents the Commerce Department and any of its bureaus or agencies from sharing personally identifiable information collected in the census with any external entity or individual. However, court filings revealed a willingness by staff in the Justice Department to leave open the possibility that the Department would reevaluate an existing legal opinion that no provision within the USA PATRIOT Act could be used to compel the Commerce Secretary to release confidential census information to other federal entities.³

Following these reports, U.S. senators sent a letter to Assistant Attorney General Eric Drieband urging the Department to publically reiterate its commitment to existing law governing census data confidentiality.⁴ The Department did not respond to the request.

Even consideration of information sharing between the Commerce Department and, for example, the Justice Department or Immigration and Customs Enforcement will have a chilling effect on participation in the 2020 Census. A national study commissioned by the Census Bureau indicated that a last-minute, untested citizenship question “may be a major barrier” to participation, with respondents citing a distrust in the federal government’s commitment to maintaining the confidentiality of census data.⁵

It is of utmost importance that the 2020 Census—a constitutionally mandated activity—be conducted in a full, fair, and accurate manner to count *all* persons in our country. Any attempt by the Justice or Commerce Departments to diminish the count of particular communities—even indirectly, through actions that agency officials reasonably should know will increase fear that census responses could be used to harm people or their families—would be in contravention of the U.S. Constitution.

Thank you for your attention to this matter, and we look forward to your response.

Sincerely,

BRIAN SCHATZ
